

# poligon® | The Commercial Advantage

## The Advantages of Choosing a Poligon Commercial Structure for Your Next Project

Architectural canopies and shade structures are critical components of large commercial projects. Poligon helps architects deliver cleaner designs, faster timelines, and fewer construction risks compared to traditional built open air structures.

Our commercial structures are fully engineered, site-specific, and designed to integrate seamlessly into your project.

## Poligon's Streamlined Process > Traditional Build

- Designed, engineered, and fabricated as a complete system
- Hidden fasteners and tube steel (concealed conduit) provide a clean finish
- Bolt-together systems with no welding or painting on site
- Less on-site equipment and waste provide safer installation and less down time if business is already open
- Single point accountability from design with ongoing installation support

## Fully Engineered + Permit Ready

- Collaborate with you to create preliminary drawings and budget pricing
- Site-specific engineering for local codes
- Signed and sealed calculations
- Integrated foundations, frames, and connections

## Long Term Performance + Warranty

- Poli-5000 powder coat finish (standard)
- Multiple certificates from AISC & AWS
- Engineered to perform in demanding environments
- Backed by a 10-year warranty

Every Poligon Commercial structure is project specific for a wide range of applications and uses, including commercial, retail, educational, corporate, and healthcare facilities. We collaborate closely with architects and designers, utilizing full access to our in-house design and engineering teams to simplify the process, and in the end, bring your ideas closer to reality. Simple, complex, freestanding, or integrated design. All you need to do is send us a sketch, a concept, or idea and we will start the process.
