

Everest Wood Structures

Large-Span Wood Structures

Poligon's Everest Wood Structures combine long lasting durability with a beautiful aesthetic. Made from fabricated southern pine laminated timbers, Everest structures are able to clear large spans without the need for intermediate support. Everest structures also have a high center pitch making them ideal for athletics, farmers markets, and show arenas. Each structure is prefabricated and stained for simplified installation.

Typical Applications

- Basketball courts
- Hockey rinks
- Pickle ball courts
- Farmers markets
- Large picnic areas
- Animal show arenas

Features

- Clear spans from 50' to as much as 100'
