

Health & Safety Benefits

Be Comfortable, Play Safer, Stay Longer

Open air structures offer many benefits to your site, including increased health and safety to those who visit, such as:

- Protection from inclement weather and prolonged exposure to UV rays
- Temperature regulation by blocking direct sunlight
- Increased lifespan of equipment by protecting from harsh elements
- Improved mental well-being by spending time outdoors in the shade
- Encourage physical activity by making spaces more enjoyable
- Ability to incorporate lighting and security (by others)

Poligon creates structures for your site specific needs. Each structure is designed to bring community together and invite them to stay longer. We offer a variety of structure options that will aid in all health and safety benefits, including:

- **Amphitheaters** - a focal point and venue for artists to perform under that will protect expensive audio & visual equipment
- **Athletic Complexes** - combine multiple structure types for athletes and spectators to make long days at the field more comfortable while providing overhead protection from the occasional stray ball
- **Park Pavilions & Fabric Shade** - provide shade over picnic and play areas to give rest during fun days in the sun
- **Farmer's Markets** - large span structures that provide year-round space for vendors to sell their locally made and harvested products

Visit us at www.poligon.com for shade inspiring ideas and see how we can increase the health and safety of all your visitors, generating a higher usage and greater appreciation of your facilities.
