

Refresh and Renew your Site with Poligon Commercial

Additions such as entrance canopies, walkway covers, trellises, and shade canopies can transform an aging site into a more welcoming, functional, and memorable destination—without requiring a complete redevelopment.

Strategically placed structures can:

- Modernize existing facilities and revitalize underutilized spaces
- Elevate the visitor experience with inviting, functional environments
- Create visual continuity and cohesive design throughout a site
- Increase comfort, accessibility, and year-round usability
- Add long-term value without the disruption and cost of major renovations
- Enhance both aesthetics and functionality through thoughtful design
- Support business growth by creating destinations where people want to gather

Reimagine aging streetscapes and underutilized spaces with thoughtfully designed architectural structures that enhance the outdoor experience. Complementing the surrounding landscape, these structures create inviting environments that inspire activity, foster community connections, and contribute to vibrant, thriving cities.

Refresh Entryways

- Create a memorable first impression
- Define primary entrances
- Provide weather protection for guests and staff
- Modernize existing buildings with minimal disruption

Renew Connectivity

- Connect buildings, parking areas, and amenities
- Improve pedestrian comfort and accessibility
- Encourage year-round use
- Create a cohesive campus or site aesthetic

Reimagine Gathering Spaces

- Transform unused areas into active destinations
- Create & define social districts
- Support community engagement and outdoor programming
- Extend the usability of parks, campuses, and commercial properties

Open-air structures help revitalize existing spaces by blending function, design, and community connection. They create inviting destinations that encourage people to gather, linger, and experience downtown in new ways. Contact us to explore possibilities for your next project.
