# T&G Stain Colors
FOR STEEL SHELTERS

## Tongue & Groove Roofing

Poligon offers six beautiful stain colors for T&G. Installed beneath the roof, it delivers an attractive and "finished" appearance. In addition to aesthetic appeal, T&G offers acoustical advantages by reducing noise and echoes.

Stain is applied to kiln-dried Hem Fir #1 or better with a specific top and bottom to each piece. Stain protects the wood, giving it a longer lifespan than unfinished material. It can be cleaned with light power washing as needed.

If you do not purchase factory stained T&G, we recommend you apply stain in the field. Non-stained wood species is 2" x 6" (nominal) kiln-dried Southern Yellow Pine #1 or better. Boards have the "V" detail on both sides allowing either side of the board to be used for best side selection.

**Cabot Stain Colors**

Snowfield

Burnt Hickory

Thatch

New Redwood (previously Gunstock)

Driftwood Gray

Calvary (previously Natural)

**The colors above are available for steel structures only.**
Different color options are available for wood structures.
