

# poligon® | The Poligon Advantage

## Engineered to Last. Built to Impress.

### Experience and Knowledge

- Since 1964, we have the experience of delivering the highest quality shelters in the Industry, now with 180+ employees.
- Our in-house design and engineering staff are licensed in all 50 states and hold the highest engineering standards in the Industry.
- Every project is custom designed and engineered to your site-specific requirements.

## The Quality You Want. The Quality You Need.

### The Only Steel Shelter Fabricator in the Industry with AISC Certification

- The highest steel fabrication certification you can receive.
- Assures our customers they are receiving the highest quality.
- Read more about our AISC certification [here](#)

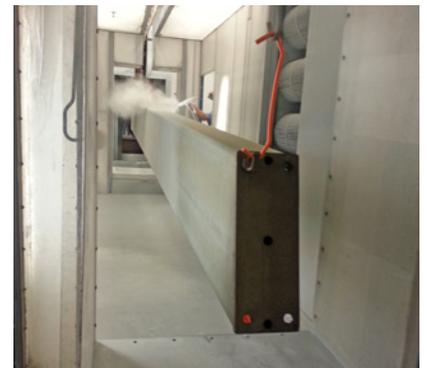

American Welding Society

### AWS Certified

- We are certified to follow the industry codes and standards set by the welding industry to ensure best practices.

### Fabricated 100% In-House

- Our state-of-the-art facility provides a single source to ensure quality standards, delivered on time and as promised.
- Every shipment that leaves our facility goes through a rigid inspection process and is packed and shipped on dedicated flatbeds so you can be confident in the highest quality shelters arriving to your location.

### The largest and most advanced Powder Coat line in the Industry

- Our Poli-5000 powder coating is the only in-house Powder Coat Institute (PCI) 4000 certified facility in the Industry, ensuring your finish qualities, aesthetics, and durability.

### Quick Install and On-Staff Field Support

- Our proprietary design and connections ensure seamless assembly without on-site cutting or welding. We are with you throughout the process to ensure that any unforeseen issues get resolved quickly and effectively.
