

PoliGuard[®] Rain Gutter System

The PoliGuard system combines the highest quality finish available with the exceptional strength and durability of steel to provide your shelter with the best looking, longest lasting rain gutter system available.

Description

- Fabricated of steel, the gutter system is a top choice of professionals for installations where robust duty is required and lasting performance is expected
- Able to withstand harsh conditions such as snow, ice, limbs, mowing equipment, baseballs, ladders, etc., forces that would quickly compromise an aluminum gutter
- The gutter and downspout offer centuries old classic looks that will complement the look of your shelter
- Low profile makes it less visually obtrusive and the distinctive rolled outer edge of the gutter makes the profile very strong
- The shallow half round gutter profile assists with self-cleaning, allowing leaves and other light debris to be carried away with the wind

Features

- 24 gauge Galvanized G90 steel
- 5" gutter / 3.5" downspout
- Easy to assemble, no special tools required
- Self cleaning
- Low profile
- Welded covers (at 90 degree corners)
- Gutters powder coated using Poligon's Poli-5000 super-durable powder coat finish, 24 colors available
- Downspouts powder coated to match frame using Poligon's Poli-5000 super-durable powder coat finish
