Northern Skyline
rectangular, two tier shelter
NSL

Design Intent:
The Northern Skyline is a variation on a traditional gable structure in which the center section is elevated creating the look of overlapping structures. Roof pitch is identical for both upper and lower roofs. Roof overhang is greater on the upper roof, with that roof extending further than the lower, creating further visual interest. The look is distinctive and offers increased natural ventilation and natural lighting.

Primary Roof Options:
• Tongue-and-Groove
• Structural Insulated Panels
• Multi-Rib • Mega-Rib
• Standing Seam*

Secondary Roofing Options:
• Multi-Rib
• Standing Seam
• Mega-Rib
• Asphalt or Cedar Shingles

Standard With This Shelter:
• Steel columns and frame members coated with super-durable Poli-5000 powder coat finish.

Shelter Modifications:
Shelter can be modified by adding railing, integrated seating, ornamentation**, gutters, lightning protection, electrical cut-outs, windscreens, walls, an increase in clearance height, or by selecting a different column design from our offering.

*Standing Seam only requires a custom frame.
**Adding ornamentation will increase the building height by 10”.
